

ARCHI-TECHNOLOGY, LLC

Communications, Life Safety and Automation Consultants

Overview of Services

Archi-Technology planning and consulting services enable your organization to effectively integrate communications systems, departments and individuals into the design and construction of modern buildings.

Archi-Technology is an independent consulting firm that provides strategic and project consulting services for local, regional and national businesses and institutions. Our design and project management services focus on the “information systems” that traditional design teams often leave to the owner to coordinate during a building construction project. These “information systems” are collectively referred to as CLA systems (Communications, Life safety and Automation) and include:

Communication Systems

Voice Systems
Audio/Video Systems
Data Systems

Communications Infrastructures

Pathways and Spaces
Structured Cabling
Wireless Systems
Private and Public Network Systems

Our “**Design to Manage**” approach results in comprehensive as-built documentation deliverable at the end of every project.

Strategic Consulting Services - Strategic Plans, Design Guides, Site and Systems Evaluations, Documentation Solutions and Staff Training

Building Systems

Alarm
Security, CCTV and Access Control
Building Automation

Clinical Systems

Nurse Call
PACS
Patient Monitoring

Project Consulting Services - Drawings, Specifications, Requests for Proposals, Cost Estimates, Bid Management, Project Management and As-Built Drawings
