

Take control of your district's technology systems

The condition of a school district's physical network and connected technology systems has a direct effect on daily operations including security, communications, and classroom instruction.

Yet due in equal parts to their complexity, rapid rate of change, and telecom legacy, most districts do not have a single person or department to take a strategic, holistic view of all technology systems. Instead, responsibilities are often split between IT, Instructional Technology leadership, Facilities Maintenance, BOCES representatives, and vendors. This can result in unaligned technology programs and projects that neither meet the district's strategic needs nor optimize available funding.

Archi-Technology LLC helps NYS school districts take a comprehensive view of their technology systems to optimize funding, meet district strategic goals, and establish a clear roadmap for the next ten years.

Get started with the "Create" bundled services package

Our "Create" bundled services package provides school districts with the knowledge and strategic approach they need to get all of technology initiatives on the same 10-year plan based on an objective assessment of current technology conditions. Optimize available funding, budget for refresh and upgrade cycles, and meet short- and long-range goals.

SERVICE	BENEFITS	DELIVERABLES
Technology Conditions Survey (TCS)	Receive an unbiased assessment of the current conditions of your district's infrastructure and systems.	<ul style="list-style-type: none"> • Technology Conditions Survey Report • Executive Summary slide deck for presentation to district and AOR representatives
Comprehensive Technology Plan (CTP)	Develop a 10-year strategic roadmap that aligns current projects with goals, identifies new projects with estimated costs and funding sources.	<ul style="list-style-type: none"> • <i>AT Plans™ Comprehensive Facilities Planning Software</i> account with filterable 10-year technology project budget estimates • CTP visual 10-year Roadmap in PDF format • CTP Executive Summary slide deck for Board presentation
Smart School Investment Plans (SSIP)	Develop an SSIP submission that meets all NYSED requirements. Avoid approval and funding delays.	<ul style="list-style-type: none"> • SSIP Executive Summary slide deck for Board presentation • SSIP Google Doc file to facilitate district submission on SED website
Design and Installation Standards	Achieve design consistency that meets industry best practices regardless of staff or vendor used.	<ul style="list-style-type: none"> • Division 27 and 28 Systems Design Guides • Division 27 and 28 Systems Installation Guides
Technology Room (TR) Master Plans	Find the ideal locations for your IT-equipment spaces. Define serving zones for optimal performance of your district's physical network.	<ul style="list-style-type: none"> • Floor plans identifying recommended CER locations and related serving zones • Recommended improvements narrative with Rough Order of Magnitude (ROM) budget
